Property	Lympstone Parish Council Cemetery	Location	Lympstone	Ref No.	
Council	Lympstone Parish	Chairman	Cllr Nick Linfoot	Date	04/03/2024
Activity	Visitor Site Risk Assessment				

Description:

This is a risk assessment of the visitor routes at Lympstone Parish Council cemetery split in to high, medium and low-level use. The use of the field takes account of different levels of use and types of activity, reflecting the numbers of people that use the area and the time that they spend in that area. The risk assessment follows the guiding principles of the 'managing visitor safety in the countryside; principles & practice' guidance produced by the Visitor Safety in the Countryside Group and is relevant for visitors to site and contractors. Any specific activities carried out on the site are covered through other risk assessments. Lympstone Cemetery is the current ground used for deceased members of the public to be buried or ashes laid. There are three large burial areas and one area for ashes. There is a paved path that runs through and around the ground. It is surrounded by a high dense hedge. The ground is easily accessible through one vehicular sized gate from the village hall private car park.

Severity of the hazard:

How serious are the consequences likely to be? Extreme (fatality) / Serious (major injury or serious ill health) / Moderate (minor injury)

Likelihood of the event:

How likely is it that the event will occur? Remote / Possible / Likely

Adequacy of controls:

Are existing precautions adequate? Good (most precautions in place) / Fair (some deficiencies) / Weak (serious deficiencies)

Entrance and footpath – low risk				
Nature of hazard	Groups at risk	Current precautions	Estimation of risk	Potential additional precautions
Vehicle to vehicle contact Vehicles entering and exiting the car park coming into contact with pedestrians.	Visitors and contractors	A well-maintained car park leads to the main entrance of the ground. Clear allocated parking bays are marked. Vegetation is cut back as part of regular cutting schedule to ensure visibility remains clear along the length of the	Severity of hazard : low Likelihood of event : possible Adequacy of controls : good	Supervision of vehicles involved in funeral procession. VHMC owns and has responsibility for upkeep, repairs and maintenance of the car park.
